```
USE imdb;

/* Now that you have imported the data sets, let’s explore some of the tables.
 To begin with, it is beneficial to know the shape of the tables and whether any column has null values.
 Further in this segment, you will take a look at 'movies' and 'genre' tables.*/

-- Segment 1:

-- Q1. Find the total number of rows in each table of the schema?
-- Type your code below:

-- Q2. Which columns in the movie table have null values?
-- Type your code below:
SELECT
    SUM(CASE WHEN id IS NULL THEN 1 ELSE 0 END) AS id,
        SUM(CASE WHEN title IS NULL THEN 1 ELSE 0 END) AS title,
```

```
   SUM(CASE WHEN year IS NULL THEN 1 ELSE 0 END) AS year,
   SUM(CASE WHEN date_published IS NULL THEN 1 ELSE 0 END) AS date_published,
        SUM(CASE WHEN duration IS NULL THEN 1 ELSE 0 END) AS duration,
   SUM(CASE WHEN country IS NULL THEN 1 ELSE 0 END) AS country,
   SUM(CASE WHEN worlwide_gross_income IS NULL THEN 1 ELSE 0 END) AS
worlwide_gross_income,
        SUM(CASE WHEN languages IS NULL THEN 1 ELSE 0 END) AS languages,
   SUM(CASE WHEN production_company IS NULL THEN 1 ELSE 0 END) AS production_company
FROM movie;
```

-- Now as you can see four columns of the movie table has null values. Let's look at the at the movies released each year.

-- Q3. Find the total number of movies released each year? How does the trend look month wise? (Output expected)

```
/* Output format for the first part:
Select count(*) as number_of_movies,year from movie
group by year

+---------------+-------------------+
| Year                    |         number_of_movies|
+-------------------+----------------
|         2017              |         2134                      |
```

| 2018 | . |

| 2019 | . |

+---------------+-------------------+

Output format for the second part of the question:

SELECT

EXTRACT(MONTH FROM date_published) AS month,

COUNT(*) AS total_movies

FROM movie

GROUP BY EXTRACT(MONTH FROM date_published)

ORDER BY month;

+---------------+-------------------+

| month_num | number_of_movies|

+---------------+----------------

| 1 | 134 |

| 2 | 231 |

| . | . |

+---------------+-------------------+ */

-- Type your code below:

/*The highest number of movies is produced in the month of March.

So, now that you have understood the month-wise trend of movies, let’s take a look at the other details in the movies table.

We know USA and India produces huge number of movies each year. Lets find the number of movies produced by USA or India for the last year.*/

-- Q4. How many movies were produced in the USA or India in the year 2019??

-- Type your code below:

```
Select country,year,count(*) as no_of_movie from movie

where year=2019 and

country in('USA','India')

group by country,year
```

India 2019 295

USA 2019 592

/* USA and India produced more than a thousand movies(you know the exact number!) in the year 2019.

Exploring table Genre would be fun!!

Let’s find out the different genres in the dataset.*/

-- Q5. Find the unique list of the genres present in the data set?

-- Type your code below:

```
Select * from genre;
```

/* So, RSVP Movies plans to make a movie of one of these genres.

Now, wouldn't you want to know which genre had the highest number of movies produced in the last year?

Combining both the movie and genres table can give more interesting insights. */

```
-- Q6.Which genre had the highest number of movies produced overall?

-- Type your code below:

Select genre,count(*) as no_of_genre

from genre

group by genre

order by no_of_genre desc
```

Drama has the highest number of movie produced

/* So, based on the insight that you just drew, RSVP Movies should focus on the 'Drama' genre.

But wait, it is too early to decide. A movie can belong to two or more genres.

So, let’s find out the count of movies that belong to only one genre.*/ -3289

```
-- Q7. How many movies belong to only one genre?
-- Type your code below:
SELECT genre, COUNT(*) AS single_genre_count
FROM (
   SELECT movie_id
   FROM genre
   GROUP BY movie_id
   HAVING COUNT(genre) = 1
) AS single_genre_movie;
```

/* There are more than three thousand movies which has only one genre associated with them.
So, this figure appears significant.
Now, let's find out the possible duration of RSVP Movies’ next project.*/

```
-- Q8.What is the average duration of movies in each genre?
-- (Note: The same movie can belong to multiple genres.)
```

/* Output format:

+---------------+-------------------+

| genre | avg_duration |

+-------------------+----------------

| thriller | 105 |

| . | . |

| . | . |

+---------------+-------------------+ */

-- Type your code below:

```
Select genre,ROUND(avg(duration)) as duration
from movie m
join genre g
on m.id=g.movie_id
group by genre
order by duration DESC
```

/* Now you know, movies of genre 'Drama' (produced highest in number in 2019) has the average duration of 106.77 mins.

Lets find where the movies of genre 'thriller' on the basis of number of movies.*/

-- Q9.What is the rank of the ‘thriller’ genre of movies among all the genres in terms of number of movies produced?

-- (Hint: Use the Rank function)

11 is the rank

/* Output format:

```
+---------------+-------------------+---------------------+
| genre                    |                movie_count     |                genre_rank    |
+---------------+-------------------+---------------------+
|drama                    |         2312                    |                        2                  |
+---------------+-------------------+---------------------+*/
-- Type your code below:
Select genre,
RANK() over (order by no_of_genre) as RANK
from
(Select genre,count(*) as no_of_genre
from genre
group by genre)
as Genre_counts
order by rank
```

/*Thriller movies is in top 3 among all genres in terms of number of movies

In the previous segment, you analysed the movies and genres tables.

In this segment, you will analyse the ratings table as well.

To start with lets get the min and max values of different columns in the table*/

-- Segment 2:

-- Q10. Find the minimum and maximum values in each column of the ratings table except the movie_id column?

/* Output format:

+--------------+------------------+--------------------+---------------------+----------------+----------------+

| min_avg_rating| max_avg_rating| min_total_votes | max_total_votes
|min_median_rating|min_median_rating|

+--------------+------------------+--------------------+---------------------+----------------+----------------+

| 0 | 5 | 177 |
          2000 | 0 | 8 |

+--------------+------------------+--------------------+---------------------+----------------+----------------+*/

-- Type your code below:

Select min(avg_rating) as min_avg_rating ,max(avg_rating) as max_avg_rating,

min(total_votes) as min_total_votes,max(total_votes) as max_total_votes,

min(median_rating) as min_median_rating,max(median_rating) as max_median_rating

from ratings

/* So, the minimum and maximum values in each column of the ratings table are in the expected range.

This implies there are no outliers in the table.

Now, let’s find out the top 10 movies based on average rating.*/

-- Q11. Which are the top 10 movies based on average rating?

/* Output format:

+---------------+-------------------+---------------------+

| title | avg_rating | movie_rank |

+---------------+-------------------+---------------------+

| Fan | 9.6 | 5 |

| . | . | . |

| . | . | . |

order by movie_counts

/* Movies with a median rating of 7 is highest in number.

Now, let's find out the production house with which RSVP Movies can partner for its next project.*/

-- Q13. Which production house has produced the most number of hit movies (average rating > 8)??

/* Output format:

+-----------------+-----------------+--------------------+

|production_company|movie_count | prod_company_rank|

+-----------------+-----------------+--------------------+

| The Archers | 1 | 1 |

+-----------------+-----------------+--------------------+*/

-- Type your code below:

```
SELECT production_company,
      COUNT(*) AS hit_movie_count
FROM movie m
JOIN ratings r ON m.id = r.movie_id
WHERE r.avg_rating > 8
GROUP BY production_company
ORDER BY hit_movie_count DESC
```

-- It's ok if RANK() or DENSE_RANK() is used too

-- Answer can be Dream Warrior Pictures or National Theatre Live or both

-- Q14. How many movies released in each genre during March 2017 in the USA had more than 1,000 votes?

/* Output format:

+---------------+-------------------+

| genre | movie_count |

+-------------------+----------------

| thriller | 105 |

| . | . |

| . | . |

+---------------+-------------------+ */

-- Type your code below:

-- Lets try to analyse with a unique problem statement.

-- Q15. Find movies of each genre that start with the word ‘The’ and which have an average rating > 8?

/* Output format:

+---------------+-------------------+---------------------+

| title | avg_rating | genre |

+---------------+-------------------+---------------------+

| Theeran | 8.3 | Thriller |

| . | . | . |

| . | . | .
|

| . | . | .
|

+---------------+-------------------+---------------------+*/

-- Type your code below:

```
select m.title, g.genre,r.avg_rating
from movie m
join genre g on m.id=g.movie_id
join ratings r on m.id=r.movie_id
where avg_rating>8
and m.title like 'Th%'
and g.genre like 'Th%'
```

-- You should also try your hand at median rating and check whether the ‘median rating’ column gives any significant insights.

-- Q16. Of the movies released between 1 April 2018 and 1 April 2019, how many were given a median rating of 8?

-- Type your code below:

20

```
Select count(*)
from movie m
join ratings r
on m.id=r.movie_id
```

```
where m.date_published between '2018-04-01' and '2019-04-01'
and r.avg_rating=8
```

-- Once again, try to solve the problem given below.

-- Q17. Do German movies get more votes than Italian movies?

-- Hint: Here you have to find the total number of votes for both German and Italian movies.

-- Type your code below:

Italian got more votes than German

```
select m.languages,sum(r.total_votes) as total_votes
from movie m
join ratings r
on m.id=r.movie_id
where languages in('German','Italian')
group by m.languages
```

-- Answer is Yes

/* Now that you have analysed the movies, genres and ratings tables, let us now analyse another table, the names table.

Let’s begin by searching for null values in the tables.*/

-- Segment 3:

-- Q18. Which columns in the names table have null values??

/*Hint: You can find null values for individual columns or follow below output format

```
+---------------+-------------------+---------------------+----------------------+
| name_nulls    |      height_nulls      |date_of_birth_nulls  |known_for_movies_nulls|
